

2022 ANNUAL SEMINAR

MANAGEMENT, CO₂ OFFSET
AND REDUCTION OF GREENHOUSE GASES -
STRATEGY, SOLUTION AND PRACTICE

USEFUL LINKS

8th Day of the Environment and Sustainability Manager/EMD/

27.10.2022, Grand Hotel "Sofia", Hall Triaditsa 1+2 and terrace

The event is supported by the Association for Sustainable Development and Environmental Protection - Germany (VNU) and is intended for environmental experts from industry as well as state administrative bodies

NGO SYMBIOZA is aiming to offer comprehensive solutions for CO₂ offset thanks to the online platform www.SYMBIOZA.org

Our mission:

We believe that symbiosis between man and nature is possible!

We are actively working to prove that progress and environmental protection are not mutually exclusive. Indeed, we believe that the benchmark for the level of human development is the quality of our protection the Earth – our shared and only possible home.

Our mission is to make it as accessible as possible for anyone who wants to undertake real actions to limit the harmful human impact on the living natural environment. We aim to do it in such a way as to achieve a guaranteed, sustainable and positive result for all.

We can help you contribute directly to resolving the global problems of climate change, deforestation, habitat loss and pollution, all of which must be on the agenda of humanity.

We believe that by united and joint efforts we can not only save our planet, but also show that we are mature enough as a society to understand, take action and correct our mistakes.

Association for Environmental Sustainability and Management – Germany (VNU)

The Association for Environmental Sustainability and Management (VNU) is a network of experts and users involved in managing environmental and sustainability issues. Members come into contact with each other, exchange experiences and participate in the development of management methods and their implementation. The association offers many different points of contact through different departments to access the entire network.

The target groups are companies (consumers), auditors and all interested parties, such as members of universities, lawyers, etc. The work of the international/national committee concerns ISO and EU standardized management systems (EMAS) as well as sustainability reporting.

VNU members can take part in EMAS Club Europe meetings, departments and webinars for free, attend open seminars at a preferential price, get involved in the work of committees or contribute to opinions on new draft laws.

With the establishment of the Bulgaria Section in the spring of 2017, VNU created a platform for the exchange of experience at the national and European level, regarding legislative trends, sustainable development and energy management.

INNO-CON – Innovation & Consulting

INNO-CON GmbH is a consulting firm working in the field of engineering ecology and environmental management. The firm's team of professionals provides management and environmental consulting services to a large number of international public and private organizations.

The company was founded during the period of unification in East and West Germany and has been operating since 1992 both on the national market and throughout Eastern Europe under the name "LUCON". In 2006, Eurofins Group acquired a majority stake in the laboratory division of LUCON, and the consulting division was transferred to Innovation & Consulting Ltd. (INNO-CON).

INNO-CON has professionally implemented project activities in EU and Germany, many countries in South East Europe, incl. the Balkans and in several countries in America.

"Gaztek BG" JSC

"Gaztek BG" JSC is one of the companies of Overgaz, whose main activity is aimed at solving the challenges related to the transition to a low-carbon economy.

The company's areas of work are aimed at:

Increasing the environmental sustainability of the activities of Overgaz group companies by developing and implementing new technologies and projects in the areas of decarbonization of supplied energy, increasing energy efficiency at all levels, reducing the carbon footprint of group companies and end customers as well and implementation of new energy-saving measures and methodologies for evaluating
